Dear Headteacher (name) and School Governors,

(Children at Xx school: Max & Claire)

Seeking your assurances about 5G, in recognition of its proven risk to health

It's a fact that most people are unaware of the dangers and liabilities posed by the installation of 5G technology and equipment onto premises. This is because the dangers have purposefully not been explained or interpreted to schools, councillors, and the public. Reasons for this do not need to be discussed, since this is not relevant. Therefore, it is up to the individual to self-educate on technologies that are changing the face of the way we communicate, but also our ecosystem (plants, animals, insects, and carbon footprint) and our biological welfare and individual rights to public health, safety and privacy.

The purpose of this letter is to inform you of the significant and provable dangers of 5G technology and equipment and therefore the actual and explicit personal responsibility of the decision makers to install 5G into St. Laurence school. Once you know this information, you cannot unknow it.

Establishing and activating a 5G-network, as it is currently described, will contravene current human and environmental laws enshrined in the European Convention of Human Rights, the UN Convention of the Rights of the Child, EU regulations, and the Bern- and Bonn-conventions protecting natural habitat and migrating species.

The reason is the very significant body of scientific documentation available, showing that radio frequency electromagnetic radiation (RFER) is harmful and dangerous to the health of humans (particularly children), animals, insects and plants. This also applies when the radiation remains within the limits recommended by International Commission on Non-Ionizing Radiation Protection (ICNIRP) and currently used in the UK as well as broadly within the EU. A court ruling in Turin in December 2019, called into question the independence of ICNIRP and concluded that ICNIRP should **“refrain from assessing the health effects of radio frequency levels.”**

The exact damaging effects to health from 5G are not yet known, since the system is not exactly defined, though given the background of the current research on the effects of radio frequency electromagnetic radiation on the bodies of humans and animals, including the

provocation of DNA damage and oxidative stress, it appears highly unlikely that it would not lead to similar harm as the current systems, particularly since it is based on the same basic form of radiation. There already exist a minority of the population with a condition known as Electrical Sensitivity (ES) to which MP Tonia Antoniazzi refers (see appendix). You have at least one child in your school with known ES, one of our children.

Non-thermal effects of 5G's EMFs and RFs are: increased cancer risk, cellular stress, increase in harmful free radicals, genetic damage, structural and functional changes of the reproductive system, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans. **These are agreed to by the 252 independent scientists and signatories to the International EMF Scientific Appeal to the U.N.**

Whilst the negative effects of the 5G EMFs and RFs extend well beyond human biological health, affecting the environment (warming, pollution, harm to nature), security, privacy and freedom, the **sole purpose in writing to you is to seek your urgent assurance that St. Laurence School will NOT be installing 5G antennae on any of its buildings or within its premises?** ... thereby exposing all of the children under its care to harmful radiation, every minute of the school day, without explanation of risk or permission of any kind,

For further information we advise that you visit this site: <https://www.emfscientist.org/>

To permit the installation of 5G wireless EMFs & RFs do so, would contravene your duties to the health of the school children, and teachers and employees of the school, and would represent a toxic trespass, and a wilful assault on the children. It would also contravene European Convention of Human Rights, the UN Convention of the Rights of the Child.

Liability

Insurance companies do NOT cover health damage from EMFs, because they are well aware that this would lead to a significant financial loss and possibly their bankruptcy, which means that individuals become liable personally (i.e. yourself, the head teacher, and the governors: list by name).

We request that you reply to us with immediate assurance to the following points:

1. That 5G frequencies will not be installed and operating within your school. I understand this diametrically opposes ICNIRP and PHE guidelines for safety **but these guidelines are insufficient to secure safety especially for children.** Relying on the ICNIRP guidelines is tantamount to a health crime to the children who are under your care. A legal case is now underway addressing this matter. Please see actionagainst5g.co.uk.
2. To understand that by taking the decision to follow ICNIRP guidelines (formed by a closed community of 14 hand-picked scientists) is against this request. It would also reflect a wanton and complete disregard of the mass of independent research and information on the subject which shows health risks of these EMFs and RFs.
3. To support your ability to read more on the subject we provide an addendum of links and information, including details of the 252 independents scientists from 43 countries who have 100's of publications citing the explicit dangers of non-ionising

radiation at levels lower than what is deemed safe. Also detailed below are those cities and municipalities which have chosen NOT to permit 5G rollout.

We are sincerely hoping that our concerns are matched by yours which would then logically translate into the prevention of all wireless 5G antennae, equipment and base stations (and any other untested technology) from being positioned within the premises or 80 metres of the outer perimeter of the school (this is the distance within which harm has been shown to occur). Once the information of harm of 5G EMFs is known, then it behoves anyone being aware of it, at the very least, to apply **The Precautionary Principle** to delay any installation until all testing has been carried out by independent scientists outside of ICNIRP's closed circle of scientists. The onus is to show with certainty that, from the peer reviewed science, the wireless EMFs and RFs used for 5G do NOT cause biological harm.

Do please understand that any decision made to install 5G technology at St Laurence school, will always remain the responsibility of the decision makers because no insurance company is covering it.

We shall also be communicating this information to the local council in order to protect all inhabitants of Xx town / city and beyond.

We thank you sincerely for taking the time to read this and in applying your duty of care to the children at Xx School.

Yours sincerely,

Mr & Mrs Very Concerned

APPENDIX

Existing EMFs & RFs are deemed as harmful & have been for decades

There is also a mass of data linking existing Electromagnetic Frequencies (EMFs) & Radio Frequencies (RFs) to multiple health conditions.

5th Generation Technology is Dangerous

<https://www.radiationhealthrisks.com/is-5g-safe-or-dangerous/>

The reason 5th Generation (5G) technology is dangerous is because its signal is RF Radiation. There are hundreds of peer reviewed scientific studies linking RF Radiation to DNA damage and cancer (see [Scientific Studies](#)).

In 2011 the World Health Organization classified RF Radiation as “possibly carcinogenic”, meaning “cancer causing” (see [IARC](#)). 2G, 3G and 4G uses between 1 GHz to 5 GHz frequencies. 5G is even more dangerous because it uses much higher frequencies, between 24 GHz to 90 GHz.

There are multiple references and links provided by this website alone.

MP Tonia Antoniazzi at Westminster Hall

This is of particular relevance to schools. A very powerful speech on the risks of 5G was given by MP Tonia Antoniazzi at Westminster Hall.

“We can no longer hide and pretend it is not happening and this cannot be swept under the carpet”.

<https://www.jrseco.com/european-union-5g-appeal-scientists-warn-of-potential-serious-health-effects-of-5g/> (17 mins 11 secs) – refers to carbon footprint and insect life. We need to apply “the precautionary principle”, as well as need to protect children at schools.

“We Have No Reason to Believe 5G Is Safe” - Scientific American, October 2019

<https://blogs.scientificamerican.com/observations/we-have-no-reason-to-believe-5g-is-safe/>

“Numerous recent scientific publications have shown that EMF affects living organisms at levels well below most international and national guidelines. Effects include increased cancer risk, cellular stress, increase in harmful free radicals, genetic damages, structural and functional changes of the reproductive system, learning and memory deficits, neurological disorders, and negative impacts on general well-being in humans. Damage goes well beyond the human race, as there is growing evidence of harmful effects to both plant and animal life.”

10. USA Portland Oregon 24th March 2019 City officials state clear opposition to the installation of 5G networks on health grounds, supported by the mayor and two commissioners. In a proposed resolution, Mayor Ted Wheeler, along with Commissioners Chloe Eudaly and Amanda Fritz, write that there’s evidence suggesting wireless networks can cause health problems — including cancer. <http://tinyurl.com/v2v19hj4>

Other towns have followed suit: Bellingham, Port Angeles, Tacoma and Gig Harbor in Washington, and Corvallis and Ashland in Oregon.

11. Italy Florence 28 March 2019 Florence applies the precautionary principle, refusing permissions for 5G and referring to “the ambiguity and the uncertainty of supranational bodies and private bodies (like ICNIRP)”, which “have very different positions from each other, despite the huge evidence of published studies”.

12. Russia 28 March 2019 – The Russian Ministry of Defence refuses to transfer frequencies for 5G, which effectively delays any 5G roll out there for several years.

13. Netherlands 4 April 2019 Members of Parliament in the Netherlands insist that radiation research must be carried out before any approval of the 5G network.

Netherlands: Parliament asks for independent investigation on 5G health risks

In the Netherlands, the Parliament is concerned about the health risks of radiation from the new 5G network. Political parties urgently want to know what the state of affairs is regarding possible dangers before masts are installed on a large scale. GroenLinks urged the Health Council of the Netherlands to carry out an independent investigation into 5G radiation. Member of parliament Laura Bromet: We still do not know about the dangers to public health. Little research has been undertaken into the effects of 5G. We have to take people’s concerns seriously and investigate this.

14. USA California 5th April 2019 California Supreme Court Justices unanimously uphold a 2011 San Francisco ordinance requiring telecommunications companies to get permits before placing antennas on city infrastructure.

15. Switzerland Geneva 10th April 2019 Geneva adopts a motion for a moratorium on 5G, calling on the Council of State to request WHO to monitor independent scientific studies to determine the harmful effects of 5G. - <http://tinyurl.com/v7jkk133>

16. Switzerland 9 April - The Canton of Vaud adopts a resolution calling for a moratorium on 5G antennas until the publication this summer of a report on 5G by the Swiss Federal Office for the Environment. - <http://tinyurl.com/y9m68j8l>

17. Switzerland 5G Opponents Block 320 of 326 Antennas- <http://tinyurl.com/va4ps989>

18. USA District of Columbia August 9th 2019. The US Court of Appeals for the District of Columbia Circuit issued a decision substantially setting back the efforts of the Federal Communications Commission to expedite the deployment of 5G technology. [https://ehtrust.org/federal-court-overturms-fcc-order.../...](https://ehtrust.org/federal-court-overturms-fcc-order.../)

19. Cyprus MPs want Health Hazard study prior to 5G
<https://cyprus-mail.com/2019/09/19/mps-want-health-hazard-study-prior-to-allowing-5g/>

20. Italy 14 municipalities, including Rome, stopped 5G. - <http://tinyurl.com/v86jcok4>

21. Malta - Godfrey Farrugia MP will be tabling a 5G warning in Parliament. - <http://tinyurl.com/ya7dz3jn>

21. Ireland. Co. Wicklow 7th October, Katherine Redmond - Motion to Oppose 5G In Co. Wicklow was passed at Council Meeting. <http://tinyurl.com/v97z32ly>

22. UK Kingsbridge Devon 8th October Moratorium
https://youtu.be/Nggr_ZlGsd0

23. Slovenia halts 5G to Investigate Health and Safety.

<https://ehtrust.org/slovenia-halts-5g-to-investigate-health-and-safety/>

“Slovenia stops the introduction of 5G technology: We do not know if it is dangerous to humans”. In Slovenia 5G had been halted, officials take more time to investigate health effects of the new technology. A letter from Minister Rudi Medved states they will reopen the debate on potential health risks.
